Employment History

ICDM Catanzaro, Italy
Full stack web developer March 2017 - May 2017

Designed and developed a niche social network website from concept to deployment.

- Implemented user authentication and authorization systems
- Created responsive layouts to ensure cross-browser and cross-device compatibility
- Implemented chat based on user geolocation

Technologies

HTML5 and CSS3, JavaScript, jQuery, MongoDB, Express.js, AngularJS, Node.js, socket.io

Lantea Working remotely
Full stack web developer September 2017 - February 2019

Build and maintain front-end and back-end, add features, and work on most aspects of the website for writing articles aimed at Dutch audience.

- Developed and maintained full-stack features for a Dutch-focused platform
- Implemented several complex features, such as chat, comments, notifications, achievements, statistics, and more
- Set up and managed Linux servers and Nginx configurations for web application deployment

Technologies

HTML5 and CSS3/LESS, JavaScript, jQuery, MongoDB, Express.js, Node.js, Typescript, Angular 2-7, Firebase, Nginx, NgRx, RxJs, Linux server, Google charts

Freelance work Working remotely
Full stack web developer February 2019 - July 2019

Work remotely for multiple clients on small to medium projects.

- Delivered custom web solutions for multiple clients, meeting project deadlines and requirements

Technologies

For freelance work, I have used every technology that is listed in the Professional Skills section, to varying degrees. It was mostly web development work, but I also worked on some software with C++, Python, and C#.

YNAP Bologna
Interface developer July 2019 - April 2020

Work as a front-end developer with an agile team on two flagship websites: Stoneisland, and Missoni.

- Contributed to the development of Stone Island and Missoni e-commerce platforms
- Implemented responsive design techniques to ensure optimal user experience across devices and browsers
- Implemented accessibility features to ensure WCAG compliance
- Collaborated with UX/UI designers to translate mockups into functional web interfaces
- Conducted code reviews and mentored junior developers
- Participated in agile ceremonies, including daily stand-ups, sprint planning, and retrospectives

Technologies

HTML5 and CSS3, Sass, JavaScript, jQuery, CSHTML, Node.js, Typescript, C#, ASP.NET | Razor, Accessibility, E-commerce, Wordpress, PHP, Jest, React | Gatsby, GraphQL

Vidiemme Milano / Bologna (Remote)
Senior Front End Developer May 2020 - July 2021

Work as a front-end developer with an agile team on an internal website for Allianz.

- Led front-end development for Allianz's internal web application
- Collaborated with back-end developers to implement GraphQL API with Angular front-end
- Implemented complex data visualizations using Highcharts
- Utilized NgRx for state management

Technologies

HTML5 and CSS3, Sass, Angular 9, JavaScript, Node.js, Typescript, GraphQL, Highcharts, NgRx, RxJs

Freelance work Working remotely
Full stack web developer July 2021 - October 2021

Work remotely for multiple clients on small to medium projects.

- Delivered custom web solutions for multiple clients, meeting project deadlines and requirements

Technologies

Mostly web development (Javascript, Typescript, Angular, HTML/CSS).

YNAP Bologna (Remote)
Senior Interface developer November 2021 - December 2022

Worked as a senior front-end developer with an agile team on the flagship website "Cartier".

- Developed and maintained front-end components for the Cartier e-commerce platform
- Implemented responsive design techniques to ensure optimal user experience across devices and browsers
- Collaborated with UX/UI designers to translate mockups into functional web interfaces
- Conducted code reviews and mentored junior developers
- Participated in agile ceremonies, including daily stand-ups, sprint planning, and retrospectives

Technologies

HTML5 and CSS3, Sass, JavaScript, CSHTML, C#, ASP.NET | Razor, Accessibility, E-commerce, Coremedia, CI/CD

Keywords Working remotely
Full stack web developer June 2024 - July 2024

A modern website for a professional recruiter.

- Developed a responsive single-page application using Angular and Firebase
- Implemented a jobs page with listings and an admin interface for managing job postings and LinkedIn reviews
- Managed entire project lifecycles, from initial consultation to final deployment, and ongoing maintenance

Technologies

Angular, Typescript, HTML/SCSS, SASS, Firebase, Node

Freelance work and stealth project Working remotely
Full stack web developer December 2022 - Present

Working part time on a stealth project, and occasionally working remotely for multiple clients on small to medium projects.

- Developing a stealth project using Angular, TypeScript, and Firebase
- Delivered custom web solutions for multiple clients, meeting project deadlines and requirements

Technologies

Stealth project in Angular with Typescript, HTML/SCSS, and Firebase backend with Node. Freelance work consists mostly of web development.
